

CORE 4: PRF WORKSHOP & LIVE-PATIENT IMPLANT SURGERY

OVERVIEW

This course is the natural progression from our CORE 1, 2 and 3 programs. It consists of three days with the first primarily focused on advanced PRF protocols. The remaining two days will be focused a review of pertinent information, livepatient implant training, and group discussions both pre-surgery and postsurgery. Dentists who have taken the CORE 1, 2 and 3 programs will be able to put into practical application the knowledge that they received. Dentists can bring one patient each and incur the costs of materials used. Should a dentist like to bring an additional patient there will be an additional charge.

Platelet Rich Fibrin is a technology introduced by Dr. Joseph Choukroun and researched by Dr. David Dohan in 2006. Refined protocol such as PRGF (Anitua, E) and L-PRF (Miller, R) have enhanced the technology, each claiming superiority. This has led to misunderstanding and confusion. Current third party research has evaluated and concluded on the advantages and disadvantages of each system. This program will assist in understanding each protocol and dispel any myths and misconceptions. It will also instruct on proper clinical applications of PRF and introduce you to the most advanced procedures in this field, including "PRF Block" applications (Jan 2016).

TUITION & CE

\$3,449 USD **30 CE Hours**

REFUND POLICY

Registration requirements include a non-refundable deposit for any Digital Dentistry Institute program. Balance of the program (unless in a financing or payment plan) will be charged to your credit card 30 days prior to the start of the course(s).

ADA C.E.R.P.® | Continuing Education Recognition Program

The Digital Dentistry Institute is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

PREREQUISITES

The target of this class is a dentist who is looking to expand their knowledge base in Oral Implantology with new innovations as well as major foundational information. CORE 1 & 2 is the minimum required or an equivalent courses.

LEARNING TOPICS

- Pre-surgical planning
- Implant surgical principles
- Post-operative principles
- Surgical placement of implants and adjunctive procedures needed to complete the case such as atraumatic extractions, ridge augmentation, PRF utilization and indirect sinus grafting **(Hands-on)**
- Case review and discussion on important clinical issues
- Complication avoidance & management
- The science and difference between the three leading PRF protocols: L-PRF, A-PRF, and PRGF
- Clinical application for both hard tissue and soft tissue procedures
- Venipuncture, taught by a highly-experience phlebotomy instructor **(Hands-on)**

SCHEDULE

DAY 1 (Friday)

7:30 - 8:00: Breakfast
 8:00 - 10:00: Lecture
 10:00 - 12:00: Lecture
 12:00 - 1:00: Lunch
 1:00 - 2:00: Lecture
2:00 - 5:00: Hands-On

DAY 2 (Saturday)

All-Day: Surgery

DAY 3 (Sunday)

All-Day: Surgery
